Why Choose Inkema?

Because we have distribution in more than 42 countries. And of our extensive product range as well as our continuous safety, reliability and constant quality controls. We provide a rapid and efficient after-sales service and qualified technical service. It Makes no different whatever the reason might be. When you purchase an inkema product, you are talking the right decision

Dock Levellers

Perfect Combination of speed, Functionality and safety

Inkema offers a wide range of hydraulic bays that will help you bride the gap between your warehouse and the boxes in the trucks. We also provide different types of constructive solutions so you can select the one that suits best your facilities.

Scissor Lifts

Adaptable to different heights and loading capacities

inkema scissor lifts are used for moving loads with any weight and volume vertically to the required height. They are robust, well designed and guaranteed to meet the demands of each client

Dock Shelters

Flexibility and saving are no longer incompatiale

Inkema dock shelters are designed to ensure important energy savings in all cases, as they provide a thermal barrier from the exterior environment, and improved hygiene inside the building in all cases, without affecting the case and flexibility of loading and unloading operations.

Industrial Doors

Having it all is now Possible

Security, Modular, adaptable doors. Heat proof and sound proof. Specially designed for use in warehouses, logistic centres and in any type of installation. We offer a broad range of finishes and accessories including glazed doors, insulation with 80 mm panels, incorporation of pedestrain doors, stainless steel trim, etc.

High-Speed Doors

Always Open to satisfy your needs

Inkema has a varied range of high-speed doors which are designed as dividing elements for areas with continuous and heavy traffic, in all cases ensuring the correct insulation, inkema offers four types of hi-speed doors to cover different needs, Foldable, Rolling self-repairing and frigorific

Fire Doors

Regulatory Compliance is now much easier.

Inkema offers different constructive solution (Sliding, folding, guillotine, roller, pedestrian etc)with different resistance characteristics (from 60 up to 240 minutes) Coordinated with fire-detection system, and a wide choice of accessories

Quiko was founded in 1968, completing in 2008 its first 40 years of invention, design and production of gearmotors for automation systems along the furrow of traditional Venetian reliability, entrepreneurial spirit and attention to technological innovation which has made the industries in the North East of Italy leaders in many disparate sectors.

QUIKO produces and commercialises automation systems for gates and doors together with other systems of automation for varied types of use.

The ample range of products includes automation for civil and industrial gates, barrier gate, automatic barriers, systems for the management of parking lots, automatic rising bollards, access control systems, automatic doors and still more.

Thanks to a range of products thought by QUIKO to answer with efficiency and reliability to the life of every day.

Automatic barriers, bollards and parking systems

ICARUS automatic barrier gate by QUIKO are suitable for both residential and intensive use; The fast gear motor will allow the automatic barrier to open in 2 seconds.

CENTURION represents the real security barrier. QUIKO automatic rising bollards have been designed to resist to high impact forces and work smoothly in all environmental conditions.

PARKY KIT, the complete solution to manage a parking system: equipments like pay on foot machines, automatic entry/exit station and others to create your parking system.

GARAGE DOOR OPENERS

Certain about the experience in home automation systems achieved during the years, QUIKO presents its range of garage door operators.

Boxter series automations for garage doors allow to automate either up and overs doors or tilt-up doors easily and securely. The backup battery system available for the 24V garage door opener allows the automation to function even in case of electrical blackout. Moreover, through the apposite manual release system available for all QUIKO garage door openers, the user can operate the door manually for any convenience.

Every operator for garage doors from QUIKO has been designed to become part of the door and to work noiselessly so to let the user forget about it. All of the components used for its construction come from top quality long lasting materials.

BOXTER garage door openers are suitable for domestic use. Get your easy to install garage door opener suitable for all garage doors. Secure your premises with ease with QUIKO garage door operators.

Roller shutter motors

OPERA Roller shutter motor for spring balance roller shutters. Available with or without built in electronic brake. Secure your premises with ease with QUIKO.

Swing gate openers

NEO is the linear swing gate operator of QUIKO particularly intended for residential applications, Leaves up to 4m 300Kg can be automated with ease with this slim motor.

ROTELLO swing gate actuators are suitable for both domestic and industrial use. ROTELLO linear arm swing gate actuators constitute the easiest way to automate your gate.

Hydraulic swing gate openers designed for intensive use. The extreme power released by the motor will allow to automate even the heaviest swing gate.

SCARABEO Articulated Swing Gate Operator has been designed for gates with large pillars and lightweight structures. Hence it is the perfect and easy to install solution for one leaf pedestrian gates.

SPIDER Articulated Swing Gate Operator has been designed for gates with large pillars up to 3,5m long. Recommended for intensive use.

SUB series underground swing gate openers for both domestic and intensive use. Get your heavy duty underground swing gate opener suitable for all environmental conditions.

Automatic doors

WINNY is the ready to install solution from QUIKO for automatic doors (max 160kg or 130+130kg); Each kit includes all components to let your door be in compliance with the European Safety Normatives.

Consecutively to the success achieved by the WINNY series automations, QUIKO unveils **WINNY LIGHT**, the complete and ready to install automatic door kit for lighter doors.

SWINGY series automations for swinging doors from QUIKO unite power and ease of use. Dependently on the selected model, it will be possible to automate swinging doors.

Sliding gate openers

ZEBRA series sliding gate operators of QUIKO unite ease of installation with huge power and reduced dimensions, allowing for more versatility of installation in narrow spaces.

ERCOLE operator is a powerful 400Vac three-phase industrial slide gate motor which is capable to move doors weighing up to 3000Kg, The oil-bath gearbox guarantees maximum reliability.

TITANO heavy duty sliding gate Motor allows you to automate the biggest sliding gates with ease. The extreme power released by the motor makes it able to move slide gates up to 6000Kg with safe.

MOOVY slide gate operators are suitable for both domestic and industrial use. Get your heavy duty slide gate operator suitable for all environmental conditions. Secure your premises with QUIKO.

Hands-free opening devices

AMBROGIO is the innovative, state-of-the-art hands-free opening system from QUIKO, allows to enable an automation without usage of transmitters but approaching the gate with the car.

FALCON is the revolutionary license plate recognition system from QUIKO allowing to control an automatic gate or barrier simply approaching it with an authorized car.

OZAK was founded in 1974 and is proud of being the first and leading access control producer in Turkey.

OZAK; providing high quality and reliable solutions, is the correct choice for many companies in a broad geography covering more than 70 countries.

Like no other company in the field; the capability of developing customised solutions in close cooperation with its customers is the reason behind this success.

OZAK has an ISO 9001:2008 registered manufacturing facility with a total area of 14.000 m2 of which 9600 m2 covered, available to work with you to develop and bring your project to life in the most cost-effective way possible.

The product range includes "pedestrian" and "vehicle" passage control systems..

FULL HEIGHT TURNSTILES

HYDRUALIC ROAD BLOCKER
